### **DETAILED ACTION**

1. As originally filed, this application has 30 claims and this application does not have claim 20 (Claim number jumps from 19 to 21). The examiner renumbers claims 21-31 to 20-30 (and also their dependency), respectively.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-19 and 25-29, drawn to a method for refining motion vector using SAD, classified in class 375, subclass 240.16.
  - II. Claims 20-24 and 30, drawn to a video encoding method using time measure to encode a series of blocks, classified in class 375, subclass 240.24.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different invention of group I has different modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2613

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
